1. Product description

1.1 Purpose

The XT60 Y-splitter lets you power **two devices from a single battery or power supply** with an XT60 connector. On one side it has one XT60 male connector (input), on the other side two XT60 female connectors (outputs). Both output sockets are connected to the input in parallel, so they carry the same voltage as the connected source.

The splitter is a short version without wires – the connectors are joined directly and the joint is insulated with heat-shrink tubing.

① input – XT60 male · ② outputs – 2× XT60 female · ③ joint insulated with heat-shrink tubing

1.2 Technical data and package contents

Product designation	XT60 Y-splitter – 1xM 2xF – Short
Input	1× XT60 male connector
Outputs	2× XT60 female connector, wired in parallel
Design	short, without wires; joint insulated with heat-shrink tubing
Package contents	1× Y-splitter
Not included	battery, power supply, powered devices or connecting cables

※ The manufacturer does not specify the maximum permissible current. The current of both devices adds up and all of it flows through the input connector – the total must be within the capability of a single XT60 connector.

2. Use

2.1 Connection

① Make sure that both devices you want to power are rated for the voltage of the power supply or battery you are connecting.

② Check that the splitter and its connectors are not damaged, deformed or burnt.

③ Connect the devices to be powered to the output sockets ② (XT60 female). An XT60 connector can only be inserted one way – never force it.

④ Only then connect the input connector ① (XT60 male) to the battery, power supply or a cable with a mating XT60 female connector.

⑤ When disconnecting, disconnect the power source first, then the powered devices. Pull the connectors by their plastic housing, not by the attached cables.

While a power source is connected, both output sockets are live – including one that is left unused. Keep the free socket away from metal objects to prevent a short circuit.

2.2 Safety rules

- The splitter distributes power **from one source to two loads**. Do not use it to connect two batteries or power supplies together – batteries with different voltages may cause a high equalising current, overheating and fire.
- The combined current of both devices must not exceed the capability of the power source, the battery or the XT60 connectors.
- If the splitter becomes noticeably warm, smells or deforms, disconnect the power source immediately and stop using it.
- Observe the correct polarity of all connected devices. Never modify the XT60 connectors.
- Do not leave the splitter connected to a battery unattended, and disconnect it from the battery after use.
- Use it only in a dry environment, away from flammable materials. This product is not a toy – keep it out of the reach of children.

2.3 Maintenance and storage

- Before each use, check that the connectors are not loose, deformed or blackened and that the heat-shrink insulation is not damaged. Discard a damaged splitter.
- Keep the contacts clean and dry; remove dirt with a dry brush or compressed air.
- Store in a dry place, disconnected from the battery and power supply, so that the contacts cannot touch metal objects.

3. Information for the EU and Czech Market

3.1 Importer and responsible person in the EU

The product is placed on the European Union market by the importer stated below, who is at the same time the responsible person within the meaning of Article 16 of Regulation (EU) 2023/988 of the European Parliament and of the Council on general product safety (GPSR).

Importer / responsible person in the EU	Rotorama, s.r.o.
Company ID (IČO)	051 57 692
VAT ID (DIČ)	CZ05157692
Registered office	Okrajová 1351, 674 01 Třebíč, Czech Republic
E-mail	info@rotorama.cz
Phone	+420 252 252 098
Website	www.rotorama.com

3.2 Disposal of electrical equipment

- The crossed-out wheeled bin symbol on the product, its packaging or in the documentation means that at the end of its service life the product **must not be disposed of together with mixed municipal waste**.
- Hand it over at a take-back point for electrical equipment – at a collection yard, at a take-back point of a collective system, or at the retailer when purchasing a new equivalent product. Take-back is free of charge for the end user.
- The obligations under Act No. 542/2020 Coll., on end-of-life products, are fulfilled by the importer through a collective take-back system.
- Proper disposal helps prevent negative impacts on the environment and human health and contributes to the reuse of secondary raw materials.

Through its contractual partner **ASEKOL a.s.**, the company ensures the take-back of waste electrical equipment from households and the separate collection of waste electrical equipment, batteries and accumulators in accordance with the applicable legislation. The customer is entitled to hand over old electrical equipment or a battery or accumulator at any collection point of the above contractual partner. The addresses of these take-back points are listed at www.asekol.cz, www.ecobat.cz and also https://visoh2.mzp.cz/RegistrMistZO/RegistrMistZOPublic/MapaMistZpetOdberu.

4. Warranty and rights arising from defective performance

The rights and obligations of the contracting parties are governed by Czech law, in particular by Act No. 89/2012 Coll., the Civil Code, and Act No. 634/1992 Coll., on consumer protection.

- The seller is liable to the buyer for the product being free of defects on receipt. If the buyer is a consumer, a defect may be notified **within two years of receipt** of the product (Section 2165 of the Civil Code).
- If a defect appears within **one year** of receipt, the product is deemed to have been defective already at the time of receipt (Section 2161(5) of the Civil Code).
- When purchasing online, a consumer has the right to **withdraw from the contract within 14 days** of receiving the goods without giving a reason (Section 1829 of the Civil Code).
- Claims should be made with the retailer from whom you purchased the product. The importer's contact details are given in Chapter 3.1.
- The competent body for out-of-court settlement of consumer disputes is the **Czech Trade Inspection Authority**, Štěpánská 796/44, 110 00 Prague 1, www.coi.cz.
