Soldering Iron Stand

SEQURE · mini stainless steel stand
User manual

Read this manual before use and keep it for future reference. The tip of the soldering iron stays hot long after it has been switched off – always put a hot iron down in the stand and never leave it unattended.

1. Product description

1.1 What it is for

The SEQURE stand is a small stainless steel wire stand for resting a hot soldering iron while you work. The iron lies supported in the stand, its hot tip does not touch the work surface or any cables, and both of your hands stay free to position a component or hold a wire.

The manufacturer designs it for mini soldering irons. The stand folds flat and weighs only 10 g, so it fits in a tool bag and is handy for soldering away from the workshop or in tight spaces where there is no room for a large stand.

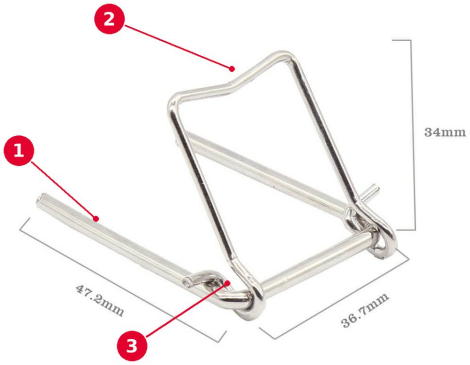

The stand unfolded

1.2 Technical data and package contents

Product designation	SEQURE Mini Stainless Steel Iron Frame (manufacturer code PJ001GLTJ)
Manufacturer	SEQURE (www.sequremall.com)
Material	stainless steel
Dimensions (unfolded)	47.2 × 36.7 × 34 mm
Weight	10 g
Intended for	mini soldering irons
Package contents	1× stand
Not included	soldering iron, cleaning sponge or brass wool, solder, flux

2. Use

2.1 Parts

Dimensions are given by the manufacturer in millimetres.

① **Base** – rests on the work surface and carries the whole stand.

② **Rest with a notch** – the body of the soldering iron is laid in the notch.

③ **Hinge** – lets you fold the rest down to the base and fold the stand flat.

2.2 Unfolding the stand and resting the soldering iron

① Fold the rest up until the stand stands firmly on its base, as shown in the picture in Chapter 2.1.

② Place the stand on a flat, firm and non-flammable surface (e.g. a silicone soldering mat), away from the edge of the table.

③ Lay the body of the soldering iron in the notch of the rest so that the hot tip does not touch the surface, cables, the stand or anything else.

④ Check that the iron lies steadily and cannot roll off or tip over. Route the iron's power cable so that nobody can catch it.

※ The stand is very light. Do not pull on the soldering iron's cable while the iron is in the stand – the stand could tip over together with the hot iron.

2.3 Folding and carrying

① Switch the soldering iron off and put it away. Let the stand cool down before folding it – it can get warm from the iron.

② Fold the rest down to the base at the hinge.

③ Store the folded stand in your tool bag.

The stand folded

3. Safety and maintenance

3.1 Safety instructions

- The tip of a soldering iron reaches very high temperatures and stays hot long after it has been switched off. Put a hot iron down only in the stand, never loose on the table.
- The metal stand can get warm from the iron. After soldering for a longer time, do not touch it until it has cooled down.
- Use the stand only on a stable, flat and non-flammable surface, away from flammable materials.
- Never leave a hot soldering iron unattended. When you have finished, switch it off and disconnect it from the power supply.
- Keep the stand and the soldering iron out of the reach of children and animals.
- Do not use a stand that is bent, does not stand steadily or does not hold the iron reliably.
- When soldering, follow the instructions of the manufacturers of the soldering iron, solder and flux, and ensure adequate ventilation.

3.2 Cleaning and storage

- Clean the stand only after it has cooled down, using a dry or slightly damp cloth. Dried flux residue can be removed with isopropyl alcohol, for example.
- Store the stand in a dry place, ideally folded in your tool bag so that the wire does not get bent.

4. Information for the EU and Czech Market

4.1 Importer and responsible person in the EU

The product is placed on the European Union market by the importer stated below, who is at the same time the responsible person within the meaning of Article 16 of Regulation (EU) 2023/988 of the European Parliament and of the Council on general product safety (GPSR).

Importer / responsible person in the EU	Rotorama, s.r.o.
Company ID (IČO)	051 57 692
VAT ID (DIČ)	CZ05157692
Registered office	Okrajová 1351, 674 01 Třebíč, Czech Republic
E-mail	info@rotorama.cz
Phone	+420 252 252 098
Website	www.rotorama.com

4.2 Disposal

The stand is not electrical equipment and contains no batteries. At the end of its service life, dispose of it as scrap metal – at a municipal collection point or a scrap metal dealer. Sort the packaging by material into the appropriate recycling container.

5. Warranty and rights arising from defective performance

The rights and obligations of the contracting parties are governed by Czech law, in particular by Act No. 89/2012 Coll., the Civil Code, and Act No. 634/1992 Coll., on consumer protection.

- The seller is liable to the buyer for the product being free of defects on receipt. If the buyer is a consumer, a defect may be notified **within two years of receipt** of the product (Section 2165 of the Civil Code).
- If a defect appears within **one year** of receipt, the product is deemed to have been defective already at the time of receipt (Section 2161(5) of the Civil Code).
- When purchasing online, a consumer has the right to **withdraw from the contract within 14 days** of receiving the goods without giving a reason (Section 1829 of the Civil Code).
- Claims should be made with the retailer from whom you purchased the product. The importer's contact details are given in Chapter 4.1.
- The competent body for out-of-court settlement of consumer disputes is the **Czech Trade Inspection Authority**, Štěpánská 796/44, 110 00 Prague 1, www.coi.cz.
