1. Product description

1.1 What it is for

The XT60 cable with banana plugs connects a charger to a battery with an XT60 connector. One end carries an XT60 connector, the other end two banana plugs – red and black – which plug into the output sockets of the charger.

The cable carries only the main charging current. For balance charging of multi-cell Li-Po batteries, the battery's balance connector is also connected to the charger.

Banana plugs for connecting to the charger – red (+) and black (–)

1.2 Technical data and package contents

Product designation	XT60 charge cable with banana plugs
Battery-side connector	XT60
Charger-side connectors	2× banana plug: red (+), black (–)
Wires	red and black, insulation printed “12AWG”
Package contents	1× cable
Not included	charger, battery, balance lead

The product contains no electronics and no batteries.

2. Use

2.1 What you will need

- a charger with output sockets for banana plugs,
- a battery with an XT60 connector,
- for multi-cell Li-Po and LiHV batteries, also a balance connection to the charger,
- a non-flammable surface or a protective bag for charging batteries.

2.2 Connecting step by step

- ① Switch the charger on, but do not start charging yet. Do not connect the cable to the battery yet.
- ② Insert the **red** banana plug into the **red (+) socket** and the **black** banana plug into the **black (–) socket** of the charger output.
- ③ Only then connect the XT60 connector to the battery connector. The XT60 connector is keyed and fits correctly only one way – never force it in.
- ④ With a multi-cell battery, also connect the balance connector to the charger.
- ⑤ Set the battery type, cell count and charging current on the charger according to the battery's specifications and start charging.

Never plug the banana plugs into the charger while a battery is connected to the other end. The banana contacts would be live and touching each other would cause a short circuit.

*XT60 connector for
connecting the
battery*

2.3 Disconnecting after charging

- ① Stop charging on the charger.
- ② First disconnect the XT60 connector from the battery – pull on the connector body, not on the wires.
- ③ Disconnect the balance connector.
- ④ Finally, pull the banana plugs out of the charger.

2.4 Safety and care

- Charge only under supervision, on a non-flammable surface and away from flammable objects.
- Check the wire insulation and the connectors before each use. Do not use a damaged cable.
- Observe correct polarity: red = plus (+), black = minus (–).
- The contacts of the banana plugs and the XT60 connector must not touch each other or come into contact with metal objects.
- Do not bend the cable sharply at the connectors and do not expose it to moisture.
- The product is intended for persons aged 14 and over.

3. Information for the EU and Czech Market

3.1 Importer and responsible person in the EU

The product is placed on the European Union market by the importer stated below, who is at the same time the responsible person within the meaning of Article 16 of Regulation (EU) 2023/988 of the European Parliament and of the Council on general product safety (GPSR).

Importer / responsible person in the EU	Rotorama, s.r.o.
Company ID (IČO)	051 57 692
VAT ID (DIČ)	CZ05157692
Registered office	Okrajová 1351, 674 01 Třebíč, Czech Republic
E-mail	info@rotorاما.cz
Phone	+420 252 252 098
Website	www.rotorاما.cz

3.2 Disposal

- A cable sold separately is electrical equipment. It contains no electronics and no batteries.
- The crossed-out wheeled bin symbol on the product, its packaging or in the documentation means that at the end of its service life the product **must not be disposed of together with mixed municipal waste.**
- Hand it over at a take-back point for electrical equipment – at a collection yard, at a take-back point of a collective system, or at the retailer when purchasing a new equivalent product. Take-back is free of charge for the end user.
- The obligations under Act No. 542/2020 Coll., on end-of-life products, are fulfilled by the importer through a collective take-back system.
- Proper disposal helps prevent negative impacts on the environment and human health and contributes to the reuse of secondary raw materials.

Through its contractual partner **ASEKOL a.s.**, the company ensures the take-back of waste electrical equipment from households and the separate collection of waste electrical equipment, batteries and accumulators in accordance with the applicable legislation. The customer is entitled to hand over old electrical equipment or a battery or accumulator at any collection point of the above contractual partner. The addresses of these take-back points are listed at www.asekol.cz, www.ecobat.cz and also <https://visoh2.mzp.cz/RegistrMistZO/RegistrMistZOPublic/MapaMistZpetOdberu>.

4. Warranty and rights arising from defective performance

The rights and obligations of the contracting parties are governed by Czech law, in particular by Act No. 89/2012 Coll., the Civil Code, and Act No. 634/1992 Coll., on consumer protection.

- The seller is liable to the buyer for the product being free of defects on receipt. If the buyer is a consumer, a defect may be notified **within two years of receipt** of the product (Section 2165 of the Civil Code).
- If a defect appears within **one year** of receipt, the product is deemed to have been defective already at the time of receipt (Section 2161(5) of the Civil Code).
- When purchasing online, a consumer has the right to **withdraw from the contract within 14 days** of receiving the goods without giving a reason (Section 1829 of the Civil Code).
- Claims should be made with the retailer from whom you purchased the product. The importer's contact details are given in Chapter 3.1.
- The competent body for out-of-court settlement of consumer disputes is the **Czech Trade Inspection Authority**, Štěpánská 796/44, 110 00 Prague 1, www.coi.cz.
