1. Product description

1.1 Intended use

The Gemfan Cube Mini (named Gemfan Pop Up Cube Gate Indoor by the manufacturer) is a folding race gate for small FPV quadcopters, especially whoops. It consists of four square frames covered with chequered fabric with a red edge; when unfolded, they form the walls of a cube measuring 75 × 75 cm. You can fly through the gate from several directions and use it as an obstacle on a track at home, in a hall or outdoors.

The frame is spring-loaded (pop-up type): once taken out of the bag it unfolds by itself within a few seconds, and it can be twisted back into a ring just as quickly and stored in the supplied bag.

1.2 Specifications and package contents

Product designation	Gemfan Pop Up Cube Gate Indoor (sold by Rotorama as: Gemfan Cube Mini)
Manufacturer	Gemfan, www.gfprops.com
Gate size	75 × 75 cm
Folded size (bag)	35 × 35 cm
Weight	0.54 kg
Package contents	1× Gemfan Cube Mini gate 1× bag
Not included	drone, weights or pegs for anchoring, lap timer

Data according to the manufacturer Gemfan and the Rotorama product page.

2. Use

2.1 Unfolding and setting up the gate

① Open the bag and take out the folded gate. Hold it firmly with both hands and **away from your face**.

② Release the gate or toss it gently onto a clear area – the spring frames unfold by themselves. Make sure there are no people, animals or fragile objects nearby.

③ Arrange the unfolded frames into a cube so that all four walls stand upright and the openings are clear.

④ Place the gate on a level surface. Outdoors, weigh it down or anchor it with your own means as needed – wind or the propeller downwash can move or tip over the lightweight gate.

2.2 Flying through the gate

- Position the gate so that there is enough free space behind it for exiting and for a possible landing.
- The openings in the individual walls can be flown through from different directions – combine several gates to build a track.
- Start slowly; hitting the frame usually only moves the gate, but it can damage the propellers or the drone's protective duct.
- After a crash inside the gate, Disarm the drone (motors off) first and only then take it out of the gate.
- When flying, comply with the drone regulations of the country in which you are flying.

2.3 Folding into the bag

Folding spring frames takes a little practice. Proceed calmly and never force the gate.

① Bring the walls of the cube together so that all four frames lie flat on top of each other.

② Grip the stack of frames on opposite sides and twist your hands in opposite directions – the frames will start to coil into smaller loops.

③ Press the loops together until a flat ring is formed and put it into the bag. Close the bag with the zip.

2.4 Safety, care and storage

❋ The folded gate is under tension. When taking it out of the bag and unfolding it, the frame opens forcefully – always keep it pointed away from your face and from other people.

- This product is not a toy. Keep it out of the reach of small children; the bag is not intended for play.
- Do not use the gate near open flames or other heat sources.
- Remove dirt with a dry or slightly damp cloth. Let the gate dry completely before folding it.
- Store it folded in the bag in a dry place, away from direct sunlight.
- Do not use a broken or protruding frame – a sharp end can cause injury.

3. Information for the EU and Czech Market

3.1 Importer and responsible person in the EU

The product is placed on the European Union market by the importer stated below, who is at the same time the responsible person within the meaning of Article 16 of Regulation (EU) 2023/988 of the European Parliament and of the Council on general product safety (GPSR).

Importer / responsible person in the EU	Rotorama, s.r.o.
Company ID (IČO)	051 57 692
VAT ID (DIČ)	CZ05157692
Registered office	Okrajová 1351, 674 01 Třebíč, Czech Republic
E-mail	info@rotorama.cz

3.2 Disposal

- The product is not electrical or electronic equipment and contains no batteries or accumulators.
- At the end of its service life, take it to a municipal collection site or dispose of it in accordance with the waste sorting rules of your municipality. Sort the bag and packaging material into the appropriate containers.
- Proper sorting helps protect the environment and contributes to the reuse of materials.

4. Warranty and rights arising from defective performance

The rights and obligations of the contracting parties are governed by Czech law, in particular by Act No. 89/2012 Coll., the Civil Code, and Act No. 634/1992 Coll., on consumer protection.

- The seller is liable to the buyer for the product being free of defects on receipt. If the buyer is a consumer, a defect may be notified **within two years of receipt** of the product (Section 2165 of the Civil Code).
- If a defect appears within **one year** of receipt, the product is deemed to have been defective already at the time of receipt (Section 2161(5) of the Civil Code).
- When purchasing online, a consumer has the right to **withdraw from the contract within 14 days** of receiving the goods without giving a reason (Section 1829 of the Civil Code).
- Claims should be made with the retailer from whom you purchased the product. The importer's contact details are given in Chapter 3.1.
- The competent body for out-of-court settlement of consumer disputes is the **Czech Trade Inspection Authority**, Štěpánská 796/44, 110 00 Prague 1, www.coi.cz.
